SUMMARY

Cybersecurity and IT support professional with over 8 years of experience in technical troubleshooting, customer support, and staff training. Currently pursuing an Associate of Applied Science in Computer Systems Networking and holding a Google Cybersecurity Certificate. Experienced with security monitoring, network analysis, vulnerability scanning, and ethical hacking tools including Kali Linux, Nmap, Burp Suite, Wireshark, and Splunk. Passionate about protecting systems, identifying threats, and pursuing a career as a Security Operations Center (SOC) Analyst or Cybersecurity Analyst.

SKILLS

Operating Systems (Windows, Linux, Kali Linux), Networking & Security (Troubleshooting, Ethical Hacking, Vulnerability Assessment, Network Scanning, Password Security Analysis, Threat Detection), Security Tools (Splunk, Wireshark, Nmap, Burp Suite), Programming & Databases (Python and SQL), Microsoft Office (Word, PowerPoint, and Excel), Database Management, Customer Service, Ticketing Systems

CERTIFICATIONS

Google Cybersecurity Professional Certificate – 2024

EDUCATION

Houston City College, Houston, TX

Associate of Applied Science, May 2026

- Concentration: Computer Systems Networking

RELEVANT COURSEWORK

- Network Security, Digital Forensics, Cybersecurity Fundamentals, and Threat Detection

PROJECTS

Threat Hunting with Splunk

- Analyzed security logs and system activity to detect potential threats
- Investigated PowerShell activity and authentication events
- Used search queries to identify suspicious system behavior
- Practiced log analysis techniques used by SOC analysts

Ethical Hacking Lab Environment

- Performed penetration testing exercises using Kali Linux
- Conducted reconnaissance and network scanning using Nmap
- Identified open ports, services, and potential vulnerabilities on test systems
- Practiced ethical hacking methodologies within controlled lab environments

Web Application Security Testing

- Used Burp Suite to intercept and analyze web application traffic
- Examined HTTP requests and responses to identify potential vulnerabilities
- Practiced testing for authentication weaknesses and input validation issues

Password Cracking and Security Analysis

- Conducted password-cracking exercises using Kali Linux tools
- Analyzed password hash security and brute-force techniques
- Studied best practices for password policies and authentication protection

Network Packet Analysis

- Captured and analyzed network traffic using Wireshark
- Investigated TCP/IP communications and packet behavior
- Practiced identifying suspicious network activity

EXPERIENCE

Help Desk Representative

November 2023 - Present

Elizondo's Construction, Houston, TX

- Diagnose and resolve computer hardware, software, and network issues
- Provide technical support and troubleshooting for internal systems
- Maintain digital records and documentation for support activities
- Manage scheduling, customer calls, and service requests
- Assist with administrative operations and technology troubleshooting

Learning Ambassador

November 2021 – November 2023

Amazon, Houston, TX

- Trained and mentored new employees on operational systems and safety protocols
- Facilitated onboarding and training sessions for new team members
- Supported internal communication and troubleshooting within warehouse technology systems
- Maintained documentation and improved training workflows
